Benedict Daly

Software Engineer

A Software Engineer with three years of professional experience working as a consultant on high priority projects. From startups to Fortune 500's, across half a dozen clients, I collaborated with various cross-functional teams on multiple technical stacks, with my responsibilities focused on implementing application features with modern web development frameworks and libraries.

💼 WORK EXPERIENCE

Software Engineer
Cantina Consulting

02/2020 - 09/2022   *Boston, MA*

- One of three engineers tasked with implementation of a GraphQL headless CMS; relied on React for an interactive UI and on Nextjs for static generation of pages
- Built majority of React components for a major client's website redesign, utilizing CSS modules for targeted styling and pair-programming with designers for QA
- Implemented new web application features for a startup, leveraging React custom hooks for code reuse, throttling and debouncing for performance gains, and controlled components for validation
- Tasked with refactoring key components of a React application that resolved key issues; improved unidirectional data flow with component composition and by extending React-Table for functional handling of data
- Repeatedly requested for DevOps supporting the N.A. website of a global appliance distributor; built a React application to generate database scripts based on form inputs, enhancing my workflow accuracy and productivity
- Retained for technical support on an as-needed basis for two clients, providing weekly status reports to the Cantina executive team and monthly updates to the stakeholders
- Generated new business with a client's subsidiary from an accessibility audit gauging the client's website WCAG 2.1 compliance; drafted a report with best practices, informational resources, and technical details for targeted fixes

Document Review/Contract
Symetra Life Insurance

11/2017 - 08/2018

- Coordinated document procurement between medical underwriters, group underwriters, case managers, and various contracted third parties

Jr. Full Stack Developer
Launch Academy

03/2017 - 06/2017   *Boston, MA*

- Coded extensively with Ruby on Rails and React for coupling a RESTful API to an interactive and responsive frontend
- Employed Test-Driven Development with Ruby and Javascript utilities such as Rspec, Capybara, Jasmine, Enzyme, and Sinon
- Delivered a full featured SPA on a team by utilizing pair-programming, Agile methodologies, and using Git for a version control system
- Mapped databases using ER diagrams and designed various UML visuals for modeling relationships
- Styled responsive webpages with CSS and Sass; followed design best practices such as mobile-first

🧠 SKILLS

`Javascript` `Ruby on Rails`
`HTML` `CSS` `React`
`Redux` `Nextjs` `Node`
`GraphQL` `PostgreSQL`
`SQL Server` `MongoDB`
`Git` `Tailwind` `Bootstrap`
`Material UI` `Jira`

🎓 EDUCATION

Georgetown University
B.A. English, Minor in Philosophy

05/2007
Washington D.C.

🤝 VOLUNTEER EXPERIENCE

Volunteer
Resilient Coders

07/2019 - 07/2020

Boston, MA
Training people of color for high growth careers as software engineers, and connecting them with jobs.
